THORN

LIGHTING

Your global partner for reliable lighting solutions.

Thorn, part of the Zumtobel Group, is a well-established supplier of interior and exterior lighting. Whether it is lighting sports venues, roads, offices, schools, retail outlets, logistics centres or industrial complexes - lighting is Thorn's passion and has been for 90 years. We create user-friendly lighting solutions that give optimum lighting quality with the best possible price-performance ratio. Simplicity of installation and operation are our priorities. We believe in long-standing partnerships and are constantly working to make sure that our customers are delighted with their Thorn experience. As a global brand we have a presence in more than 100 countries, providing lighting, security, comfort and convenience.

SAFETY, SIMPLICITY AND PERFORMANCE

UNIVERSAL MOUNTING

A variety of mounting options for ceilings and walls, so luminaires fit into any architectural setting

FLEXIBILITY OF APPLICATION

Many Thorn safety luminaires can also be used as illuminated safety sign luminaires, giving customers maximum flexibility

HIGH EFFICIENCY

The latest LED technology contributes to the high efficiency of Thorn's emergency lighting products

TIME-SAVING

Easy installation, maintenance, testing and operation saves users time and money

Why choose Thorn emergency lighting?

The purpose of emergency lighting is to allow people to make their way safely out of buildings in the event of an emergency for example during a black out. In these situations, lighting can save lives and keep people calm. It goes without saying that emergency lighting must comply with all relevant rules and regulations. But the best emergency lighting goes further, incorporating flexible luminaires with ease of installation and maintenance, long life and energy efficiency. Thorn's 90+ years of experience and reputation for quality are your guarantee of an optimal emergency lighting solution.

CHOOSE GENUINE EMERGENCY LIGHTING PRODUCTS FROM THORN

The Thorn emergency lighting products are designed, tested and made specifically for the purpose of emergency lighting. With the electricians in focus, Thorn provides innovative-easy-to-use products saving time and money during installation. Thanks to the flexible approach of every luminaire the product portfolio is easy to oversee and understand. Needless to say that the emergency lighting luminaires of Thorn are also covered in the 5-years warranty*, giving users peace of mind.

* batteries handled separately

Standards

PRODUCT STANDARDS

With over forty years experience in emergency lighting manufacturing, Thorn only offer products that are designed, manufactured and tested to meet the latest European standards regarding safety and EMC, including:

EN 60598-1

EN 60598-2-22

EN 62471

EN 55015

ISO7010

Thorn only produce specifically designed emergency luminaires to comply with these increasingly stringent requirements. Thorn only uses high-quality components, such as diffusers and batteries, to ensure optimum performance in all situations and full compliance with the full range of standards and regulations.

Thorn emergency fittings are tested in independent and internal test houses to make sure that these high quality standards can be achieved. Regulations on electromagnetic compatibility (EMC) state that luminaires should not emit or be susceptible to electro-magnetic radiation above certain designated levels. All Thorn emergency fittings comply with these requirements. Additionally to providing Idt., Dialux and Relux files for our safety luminaires we offer the spacing values. These spacing values make it very easy to plan the emergency lighting design scheme for your individual situation even on site.

Design Standards

European law requires that the person responsible for a building makes sure that people can safely leave the premises if the mains power fails, by putting in place emergency lighting that comes on automatically when a lighting circuit loses power. The law dictates the level of lighting required in the event of an emergency, as well as the visibility of exit signage and the time it takes for emergency luminaires to come on.

Emergency lighting falls into two categories: emergency **escape lighting** illuminates exit routes and open areas. Exit routes must be clearly lit and signed to make sure people can evacuate safely. Open-area lighting is designed to reduce confusion and panic, while at the same time ensuring visibility of the nearest exit route. Escape lighting also enables employees to shut down sensitive or potentially dangerous processes before evacuating the building. **Standby lighting** allows normal activities to continue if the main lighting fails.

Testing Options

MAINTAINING YOUR EMERGENCY LIGHTING

Once an emergency lighting scheme is designed and installed, the person responsible for the building has a legal obligation to make sure that all the emergency luminaires will operate when required. Emergency light fittings must be regularly tested to confirm that they will operate when needed. As a pioneer in the field of emergency lighting, Thorn offers three different ways of testing emergency lighting:

CONTROL TEST

Emergency light fittings are controlled by a central system. This system automatically tests each luminaire and stores the results for analysis. Control test systems are the best way of ensuring a fully functional emergency lighting scheme, particularly in larger applications.

Abbreviations for self-contained luminaires:

Abbreviations for central supplied luminaires:

AUTO TEST

All the emergency lights are equipped with an intelligent processor that automatically tests functionality and battery life. Results are shown by a two-colour LED indicator. Auto test is an ideal option for small to medium-sized applications.

Abbreviations for self-contained luminaires:

MANUAL TEST

A competent individual must walk around the building and perform a manual check on the functioning of each emergency fitting, before logging the results on a dedicated record sheet. This needs to be completed by hand and stored ready for inspection by safety authorities.

Abbreviations for self-contained luminaires:

SPACING FOR EMERGENCY LUMINAIRES

THORN EMERGENCY LIGHTING

- a1 = maximum spacing wall/luminaire
- a2 = maximum spacing luminaire/luminaire
- b1 = minimum spacing object/luminaire
- b2 = maximum spacing object/luminaire

h = ceiling height

These illustrations show how to interpret the spacing tables.

CONTENTS

THORN EMERGENCY LIGHTING

A blurred person in a dark suit and blue trousers is walking away from the camera down a modern office hallway. The hallway has a highly reflective white floor and glass walls on the right side. A large, bright yellow arrow graphic points to the right, partially overlapping the person and the glass wall. The ceiling is white with recessed circular lights. A green exit sign is visible on the ceiling in the distance.

VOYAGER

STARTS

**Performance, flexibility
and intelligence.**

VOYAGER STAR

THORNLIGHTING.COM/VSTR

Safety Luminaire

Voyager Star stands for cutting-edge performance – a light technology that adapts to every building situation, flexible mounting options including recessed, surface-mounted and continuous row-systems and a perfectly discreet appearance. Integrated PROset functionality (E1D / E3D version) offers a true digital interface and lays the foundation for new possibilities in configuration, addressing and maintenance.

BENEFITS

HIGH PERFORMANCE

Thanks to its specialised optics, Voyager Star sends light exactly where it is needed in the event of an emergency. Due to wide spacing values, luminaires can be saved when compared to other solutions and the overall project costs are reduced.

FLEXIBLE

Voyager Star can be used in a wide variety of mountings. As well as the unobtrusive recessed version, which integrates discreetly with ceilings, the luminaire is also available in a surface-mounted version, and can be integrated in Thorn's PRIMATA system.

INTELLIGENT

Beside easy configuration and addressing of the luminaire by using the PROset Tools, the luminaire can also be connected to the LITECOM or SB128 controller (E1D / E3D versions). Additionally, central battery versions (ECC/ECS versions) are available.

VOYAGER STAR APP

The VOYAGER Star app makes emergency lighting planning a breeze: After only 3 clicks, the maximum mounting distances between two luminaires and those for the wall are displayed for the selected mounting height. For further information, the automatically displayed article number links directly to the data sheet. The app is available as a homepage for laptops as well as an app for smartphones (iOS and Android).

VOYAGER

FEEL

Super compact, long-lasting,
easy to use.

VOYAGER FIT

THORNLIGHTING.COM/VOYF

Safety Luminaire

Voyager Fit is a super-compact emergency luminaire for installation in ceilings. The luminaire is just 51 mm in diameter, requiring a ceiling hole of only 43 mm and a void height of just 80 mm. Voyager Fit comes with three interchangeable lenses (anti-panic, escape and spot), which can be rapidly fitted. The product features a lithium iron phosphate battery, which plugs into its own battery pack using Micro USB and comes with three-year warranty.

BENEFITS

LONG-LASTING

Self-contained emergency luminaires rely on long-lasting batteries. Voyager Fit's high-tech lithium iron phosphate battery is robust and comes with a three-year warranty, providing the needed safety and giving users peace of mind.

SUPER SMALL

Working out where to install emergency luminaires in certain buildings can be a challenge. Voyager Fit is so small and because it only requires an 80 mm ceiling void it can be placed almost anywhere with very little impact on the appearance of ceilings.

INTERCHANGEABLE LENSES

Voyager Fit's interchangeable lenses make it easy to get the light distribution you need in the actual situation on site. Don't worry upfront about different needed variants, just fit the required lens once decided.

VOYAGER

APE

VOYAGER ESCAPE

THORNLIGHTING.COM/VOYE

Safety Luminaire

Voyager Escape is a minimalist entry safety luminaire that is easy to install. With reverse polarity protected and not swappable connectors, quick installation and avoidance of wiring errors is guaranteed. With a diameter of only 37 mm, it is one of the most discreet luminaires in our portfolio. It is also simple to specify by reducing it to a single article number with a single lens.

BENEFITS

DISCREET

With a visible surface of only 37 mm in diameter, Voyager Escape is one of the smallest emergency lighting products available. Its tiny dimensions make it unobtrusive when installed in ceilings, so it blends into the architecture of the setting.

FAST

Because time means money, the Voyager Escape has plug-and-play connectors that can be plugged in quickly and error-free. The luminaire can be installed in the ceiling without additional effort, as no lateral mounting springs have to be folded away.

EASY

Reverse polarity protection and also interchange protection between LED head and battery means wiring errors and troubleshooting after commissioning are a thing of the past. Installation is now quick, simple and trouble-free.

Flexible, durable, strong.

THORN ES

VOYAGER TWIN SPOT

THORNLIGHTING.COM/VOYT

Safety Luminaire

The Voyager Twin Spot features exceptional functionality. The components are enclosed in an IP65-rated housing that offers the best possible protection for every environmental condition. For convenient installation, there are prepared cable openings and well accessible terminals. In addition to the low weight, the Voyager Twin Spot can be configured for any application using the two adjustable light heads.

BENEFITS

THE LIGHTEST IN ITS CLASS

With changing the battery technology and a resulting weight of just 1.7 kg and a depth of 87 mm, Voyager Twin Spot is now one of the lightest and slimmest twin spot luminaires on the market, making installation easy for electrical contractors.

FLEXIBLE

Thanks to its two turnable and tiltable LED light heads, Voyager Twin Spot can be customised to the needs of every application. Even if requirements change, the luminaire can be easily reconfigured without having to change or replace anything.

PROTECTED

Voyager Twin Spot is rated IP65 for protection against moisture and dust, so that it can be used in a variety of settings. A DALI version is also available for connection to emergency lighting systems such as LITECOM or SB128, for more sophisticated safety management.

VOYAGER

Get the job done with
ONE luminaire.

VOYAGER ONE

THORNLIGHTING.COM/VOYO

With Voyager One, we have introduced a platform for emergency luminaires rather than a single luminaire. When delivered the basic luminaire is an IP65 safety luminaire. It can easily be converted into a safety sign luminaire and also adapted to all possible conditions with optional accessories. Who says you need hundreds of article codes – you can get the job done with One Luminaire.

BENEFITS

STYLE AND STRENGTH

Voyager One is an ultra-slim emergency luminaire that also achieves high levels of protection. The luminaire balances a simple blade appearance with IP65 protection against dust and moisture. Who says you can't have elegant design in demanding environments?

PRACTICAL

Thorn stands for quality and practical products. With this in mind, we make sure installation of luminaires is as simple as possible. The screw-free housing is easy to assemble, and accessories such as pictogram inserts and the recessed adapter can just be clicked in.

TWO BECOME ONE

When you combine the elements of an safety and an safety sign luminaire, you create a new type of luminaire. As well as being a high-performing safety luminaire, Voyager One can also fulfil the requirements of a safety sign luminaire. It's two products in One.

VOYAGER

SOFT

The bulkhead that makes
emergency lighting easy.

VOYAGER SOLID

THORNLIGHTING.COM/VYSO

Available in small or large versions with a consistent design, Voyager Solid provides an even, homogenous light distribution. Easy to install and configure, Voyager Solid can be used as a recessed and surface mounted luminaire on walls and ceilings. The fitting is rated IP65 for use in a variety of locations. Voyager Solid's emergency pictograms are printed on inlets that are inserted and protected inside the luminaire.

BENEFITS

CHANGEABLE INSERTS

Instead of being stuck on to the exterior of the fitting, Voyager Solid's pictograms are on inserts placed inside the luminaire, making them more durable, faster to exchange and more homogeneous in illumination.

MULTIPLE MOUNTINGS

Whatever type of building you're working in, and whatever variety of spaces you're dealing with, Voyager Solid provides a consistent solution from a single product. The luminaire can be used as a wall-mounted, ceiling-mounted or semi-recessed luminaire.

TESTING OPTIONS

Regular testing of emergency lighting is vital in order to keep buildings safe and compliant with regulations. Tests can either be performed manually or through a self-test system. Voyager Solid is available in control test, auto test and manual test versions.

VOYAGER COMPACT

Low cost,
big performance.

VOYAGER COMPACT

THORNLIGHTING.COM/VOYC

With IP65 housing and possibility to change the switching mode, Voyager Compact is proof that entry-level products don't have to mean compromising on performance. The diffuser prevents the LEDs from glaring and rounds off the industrial look. Perfect for jobs with demanding requirements, Voyager Compact represents an attractive and cost-effective option.

BENEFITS

SHOWS THE WAY

Thanks to the optional pictogram sticker, Voyager Compact can easily be turned from an safety luminaire into an safety sign luminaire. Providing more flexibility directly on site and reducing article codes as additional benefit.

SMALL, BUT TOUGH

Voyager Compact benefits from standard IP65 protection for resistance to dust and water. Where other luminaires would struggle, Voyager Compact just keeps going and provides safety even in challenging environmental conditions.

REDUCING COMPLEXITY

Maintained and non-maintained switching modes can be set up by simply plugging a jumper. To change the switching mode, the luminaire can be opened without tools. In maintained mode the diffuser reduces glare from the LED for maximum comfort.

At just 37 mm thick, Voyager Style is slim and unobtrusive. As well as self-contained versions it is also available for central battery systems. It can be easily mounted on ceilings or walls within the scope of delivery. With an adapter, recessed mounting is also possible for the sleekest possible look. Voyager Style is rated IP43* for protection against dust and moisture, making it a versatile solution.

*surface mounted versions

BENEFITS

ULTRA-SLIM

Voyager Style shows that emergency luminaires don't have to be bulky or obtrusive. At just 37 mm thick, this fitting can blend into any interior, and can be mounted in a variety of configurations. This luminaire is clear and bold when needed, while also being discreet.

POWER OPTIONS

Whether your emergency lighting system relies on self-contained luminaires or a central battery system, Voyager Style meets your needs. For self-contained systems, the three-hour versions of control test, auto test and manual are available.

SLEEK AND SIMPLE

The wide range of mounting options means Voyager Style can fit in wherever you need emergency light. The sleek mounting option makes for a particularly unobtrusive appearance especially when combined with the cord suspended pictogram.

SIGMA

The electrician's choice.

VOYAGER SIGMA

THORNLIGHTING.COM/VSIG

Safety Sign Luminaire

Thorn offers the Voyager Sigma with electrical installers in mind, which is designed for simple and hassle-free installation. We provide a large terminal compartment, ready-to-insert pictograms and the placement of the electronics on a fold-out panel just to name a few benefits. Voyager Sigma, therefore, reduces installation and maintenance effort and associated costs.

BENEFITS

PLENTY OF SPACE

Thanks to its large terminal compartment, Voyager Sigma is loved by electricians. The terminals are easy to reach and make for quick and hassle-free connection. Even over-length cables can be stowed comfortably inside the luminaire.

EASY PICTOGRAM MOUNTING

Protected inside the luminaire, the pictogram inserts according to ISO 7010 are easy to install and change if required. The cover can be opened without tools and the pictograms can therefore be fitted very quickly and precisely.

EASY ACCESS ELECTRONICS

The electronics and the battery are mounted on a fold-out panel, making commissioning and maintenance easier, as the different components can simply be folded in and out. To fold-out the panel only one screw needs to be loosened.

Safety Sign Luminaire

Voyager Blade's robust aluminium housing and tiltable bracket make it robust and easy to mount on walls and ceilings. The pictograms simply slides into the slim Plexiglas panel, making installation even easier. If additional mounting options such as recessed installation or suspension are required, the Voyager Blade is also the right choice offering a wide range of mounting variants.

BENEFITS

CEILING OR WALL MOUNTING

One luminaire, two mounting options. Thanks to its tilting bracket, the surface-mounted version of Voyager Blade can be flexibly mounted to a ceiling or wall without an adapter. Simply flip the bracket to the chosen position.

EASY MOUNTING OF PICTOGRAMS

The pictograms are fast and easy to install, just slide them in from the side and you are done. One and double-sided usage is possible with additional pictograms. Making Voyager Blade and its possible applications even more versatile.

SLIM FORMAT WITH GREAT LIGHT DISTRIBUTION

The very thin acrylic frame is almost invisible from the side, but offers a homogeneous appearance from the front due to a special print with a gradient that diffuses the light optimally.

SYSTEMS

64 ONLITE LOCAL

66 ONLITE CENTRAL eBOX

67 ONLITE CENTRAL CPS

LITECOM focuses the light on the user.

The innovative app concept makes lighting control systems exceptionally flexible. LITECOM will assume additional tasks at any time and can be seamlessly extended by new luminaires, control units or functions. In addition the emergency luminaires are monitored, tested and notifications in case of errors can be send to the user.

Luminaires, sensors and control units of any type are required.

LITECOM CONTROLLER

A combination of all functions in a compact design, the LITECOM controller is a space-saving solution in the switch cabinet and a time-saving solution in terms of maintenance. Yet the system is highly future-proof thanks to its upgradable system architecture.

Installation of a LITECOM system is as quick and precise as its design. The device can be securely mounted on the DIN rail by a flick of the wrist, and plug-in screw terminals are available for highly convenient connection.

ONLITE CENTRAL eBOX

The ONLITE central eBox is a central battery system optimised for use with efficient LED technology. Energy consumption as well as the number of batteries required have been reduced to a minimum. Due to its modular design, the number of possible output circuits is increased, providing the system with maximum flexibility in order to adjust supply perfectly to each building's requirement.

ONLITE CENTRAL CPS

ZUMTOBEL.COM/CENTRAL

This central battery installation, which is a modular system, adjusts to any specific project and exactly meets the customer's requirements. The system communicates via Set 009, which means that each Set 009 emergency luminaire can be individually monitored and controlled. Other assets of ONLITE central CPS: minimum maintenance effort, fail-safe data communication and no need for additional communication modules in the luminaires.
