

SensaLink

For more complex schemes SensaLink Digital provides a simple lighting management system without the need for a central controller or special operating software.

- Passive Infra-red (PIR) detector and photocell which responds to presence/absence and light response by dimming or switching off
- Cost effective use in offices and schools
- Integrated head controls up to 4 DSI or 2 DALI ballasts for master and slave applications
- Recessed and surface mounted heads control up to 8 DSI or 4 DALI ballasts
- Light level control
- Can be used in conjunction with ON/OFF switch (absence detection)
- DSI or DALI signalling to luminaire(s), configured via SensaLink Digital Programmer
- Easy to assemble and install
- Surface mounted, recessed or luminaire integrated versions available
- Version integrated into luminaire offers better aesthetics
- Surface version suitable for areas that do not have suspended ceilings
