

SENSA DMX TS CONTROLLER BLACK

Black wall mounted touch screen DMX Controller

Art. no. 96261606

Application

Glass touch sensitive programmable DMX Controller for indoor use

Design notes

The Sensa DMX touch screen Controller features 3 touch sensitive buttons for the control of colour, scene setting and intensity.
1 port available for remote triggering

Functional description

The Sensa DMX TS is a standalone DMX Controller with a white or black glass front, for control of up to 128 DMX channels and recall of up to 24 dynamic or static scenes.

The device is supplied ready to use with 8 pre-set scenes and can be individually programmed using the supplied software CD and the USB cable. The power supply is also included with the product.

The Sensa DMX architectural lighting software is compatible with Windows XP/Vista/7 32/64-bit.

The available memory is 12kB. This corresponds to 145 steps for 8 scenes and complete expansion with 128 channels. The 145 steps are the total number of steps available for the 8 scenes. The available steps are increased by reducing the channels used.
